SUBJECT: Special Fishing Regulations for Coolwater Species on Select Lakes -
(FO-206)

Authority:

The Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, authorizes the Director to provide for better protection and preservation of fish, game, and birds.

Discussion and Background:

We are proposing several changes to this order including two removals and one change to the beginning of the season for one lake. We recommend the removal of the special walleye size limit and possession limit restrictions for Stager Lake in Iron County (T41N, R32W, S5) and implementation of statewide walleye regulations for this waterbody. Applying statewide walleye size and possession limits on this lake should allow the bluegill and other forage fish populations to rebound as well as provide opportunities for anglers to harvest walleye.

We also recommend removing the current prohibition on walleye harvest from Long Lake in Kent County. It is apparent that the walleye in Long Lake are not surviving due to natural causes, disregard for the no-possession restriction, or a combination of the two. Current regulations are not having the desired effect on this lake, and the decision has been made to discontinue them. Walleye stocking also will be discontinued in favor of stocking in a more suitable location.

We propose a change to the opening date on Williams Lake in Barry County from April 1 (current regulation) to the last Saturday in April. Williams Lake is managed as a no kill lake to create a quality fishing experience. The language in the current order is somewhat vague and is misinterpreted to mean that all species of fish are open to angling on April 1, thereby superseding opening dates for other species. The current regulation is intended to provide a quality fishing experience, not additional angling opportunities for all species such as early season catch-and-release bass fishing. Changing the opening date to the last Saturday in April should eliminate any confusion regarding opening dates.
